M700, R700, M900 and R900 TRAILED SPRAYERS

John Deere's trailed sprayer range is built to deliver precision application, high productivity and operator comfort. Whether for mixed farms, large arable operations or contractors, these models offer advanced spraying technology designed to maximise efficiency and reduce input costs.

JOHN DEERE

M700 - Simple, Reliable Performance

Designed for operators looking for dependable spraying performance with straightforward operation.

Key Features:

- Tank capacities from 2,400–4,000 litres
- Boom widths up to 30m
- PowrSpray dual-circuit system
- ISOBUS compatibility
- Compact and lightweight design

Fast filling, accurate application and excellent manoeuvrability while remaining simple to operate and maintain. Its lightweight chassis also helps minimise soil compaction.

R700 – Advanced Precision Technology

The R700 builds on the M700 platform with greater automation and enhanced precision farming features.

Key Features:

- Individual nozzle control
- BoomTrac Pro automatic boom levelling
- AutoTrac and Section Control compatibility
- Advanced PowrSpray system

Reduced overlaps and chemical waste while improving spray accuracy across varying terrain. Automated boom control also reduces operator fatigue and maintains consistent application quality.

UNTIL 31.07.26:

ONLY 0% FOR 3 YEARS*

*The finance offer, 1+2 Annuals at 0% is for new John Deere Trailed Sprayers and is available for business users in the UK & Ireland only. The offer is available until 31/07/2026. Finance is limited to 50% of retail value.

Terms and conditions apply, refer to our website www.deere.co.uk

- **PRECISION AND PRODUCTIVITY**
- **IMPROVE SPRAYING ACCURACY**
- **REDUCE INPUT COSTS**
- **MINIMISE OVERLAP AND WASTE**
- **INCREASE DAILY OUTPUT**

JOHN DEERE

R700i SPRAYER

STAY COMPACT, GO PREMIUM

M900 – Higher Capacity for Larger Farms

For larger operations requiring increased output and longer working periods between fills.

Key Features:

- Tank capacities up to 6,200 litres
- Boom widths up to 39m
- Heavy-duty chassis
- Integrated precision farming technology

Larger tank capacity allows operators to cover more hectares per day while reducing downtime. Its strong chassis and balanced design deliver excellent stability and field performance.

R900 – Premium Performance and Control

The R900 is John Deere's premium trailed sprayer, offering maximum capacity and advanced precision technology.

Key Features:

- Tank capacities up to 7,500 litres
- ExactApply and individual nozzle control
- BoomTrac Ultimate boom guidance
- Full John Deere Operations Center™ integration

Delivers exceptional spray accuracy, reduced drift and maximum productivity. Its advanced automation and data integration help operators improve efficiency, reduce waste and make more informed agronomic decisions.

From the practical M700 to the high-specification R900, John Deere offers a trailed sprayer solution for every farming operation.
