TAG RTK NETWORK

TALLIS AMOS GROUP EXPANDS PRECISION AGRICULTURE WITH ACQUISITION OF REA VALLEY TRACTORS RTK NETWORK

Tallis Amos Group is pleased to announce the acquisition of the Rea Valley Tractors RTK base station network, strengthening its precision agriculture offering across the Midlands and beyond.

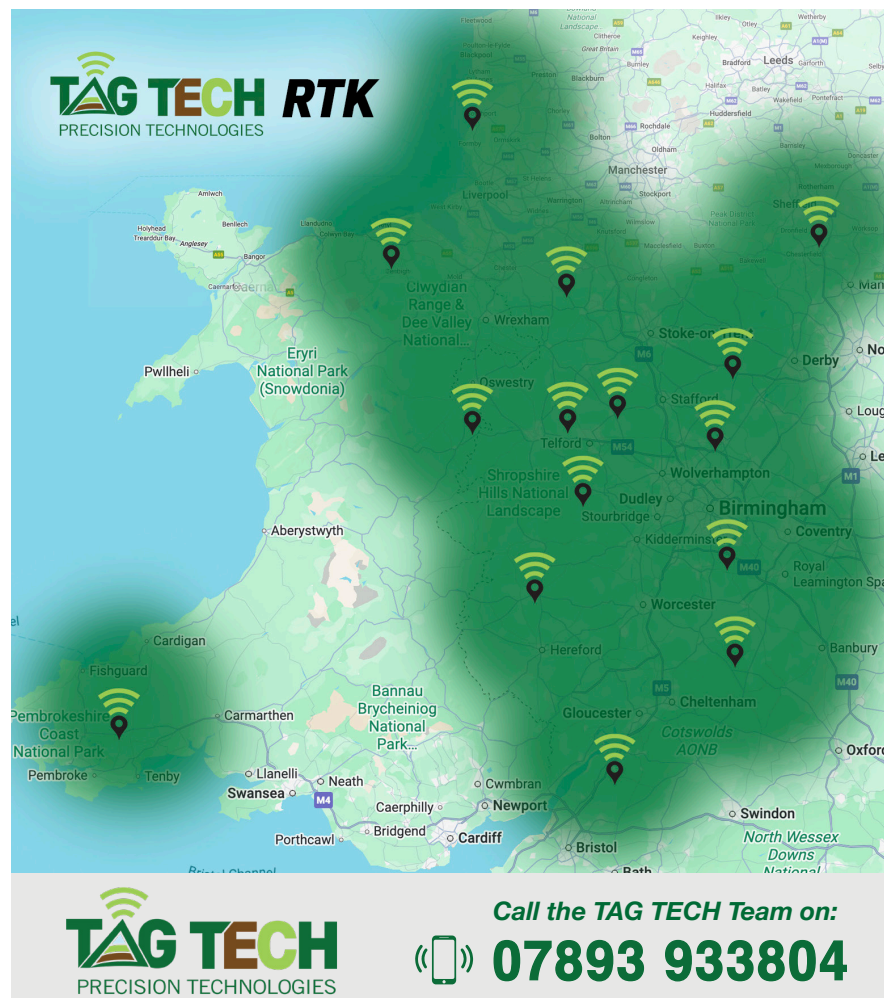

RTK correction signals enhance the accuracy of GPS-equipped agricultural machinery, enabling repeatable pass-to-pass precision for farmers and contractors.

Matthew Thompson, Tech Ops & Aftermarket Director of Tallis Amos Group, said:

"This acquisition allows Tallis Amos to expand its RTK network, ensuring Rea Valley customers who have invested in RTK hardware continue to receive reliable, high-precision correction signals. It underscores our commitment to supporting modern, technology-driven agriculture."

Users of the Rea Valley RTK network are advised to contact the Tallis Amos Precision Technology helpline on **07893 933 804** to register their details and maintain access. Over the coming months, the TAG Tech team will also update SIM cards in customers' machines as required.

Customers can continue to expect the same high-quality RTK signals, supported by dedicated precision technology specialists from the Tallis Amos Group.

2026
STOCK

JOHN DEERE 5058E

- Weighs in at a **low 3.32 t**, fits everywhere at a low overall height of **2.4 m**, and just **3.6 m** in length.
- **60.3 hp** (44.4kW)
- **2.9 L 3 Cylinder engine**
- **Wheelbase 4WD:** 2.95 t (3.32 t with Cab) and 2,050 mm
- **24F / 12R PowrReverser™**, Electric Hi-Lo
- Top speed **40 km/h**

Perfect scraper tractor. Its short wheelbase makes for an exceptionally tight turning radius, and the PowrReverser™ lets you manoeuvre back and forth effortlessly, without ever touching the clutch.

The electric Quick Raise & Lower (EQRL) lets you effortlessly control attached implements on-the-go with a cab mounted switch, ideal for frequent work around tight buildings.

Spacious cab with controls laid out for intuitive and effective operation.

Power steering and LED lights.

The entire tractor is built to keep you productive.

Please call or visit your local TAG depot for more details

JOHN DEERE MOWERS

MOWER CONDITIONERS

**NEW
2026
STOCK**

R310R REAR MOWER CONDITIONER

Excellent ground following and good crop preservation. The perfect solution for efficiency, quality, and reliability when mowing for hay and forage. The impeller conditioner enhances forage quality by ensuring a swift and uniform wilting process, leading to higher-quality forage with improved nutrient retention. Splines on the shear hub will shear to protect the gear drive. The 126° vertical folding design with the pivot point close to the tractor is extremely stable for transport.

- Rear mounted vertical fold
- Power Take-Off (PTO) Speed 1000 rpm
- 3.1 m working width
- Fast knife changing
- Impeller or rolls
- 7 disks
- 2.5m transport width

F310R FRONT MOWER CONDITIONER

Also offers excellent ground following and good crop preservation. The impeller conditioner enhances forage quality. Splines on the shear hub shear to protect the gear drive when hitting an obstacle. Easy, fast and clean to replace the shear hub. Premium hydro-pneumatic suspension follows the contours of the ground. If you hit an obstacle, the MoCo automatically pivots and actively lifts the cutterbar over the obstruction, then brings it back to the previous cutting height.

- Front Mounted
- Working Width: 3.1 m
- Power Take-Off (PTO) Speed 1000 rpm
- Fast Knife Changing
- Impeller or Rolls
- 7 disks
- 2.99m transport width

R870R TWIN REAR MOWER

Excellent ground following and good crop preservation To keep running costs down, our pioneering hydraulic breakaway. Swath merging to merge swaths while mowing for maximum area output: mowing, conditioning, and swathing in one pass.

- Power Take-Off (PTO) Speed 1000 rpm
- 8.30 - 8.70m working width
- 7 discs, impeller & Fast Knife Changing

R950R TWIN REAR MOWER

Impeller conditioner ensures a swift and uniform wilting process. Splines on the shear hub will shear to protect the gear drive. Mowing and swathing in one pass for top forage quality.

- Power Take-Off (PTO) Speed 1000 rpm
- 9.10 - 9.50m working width
- 8 discs, impeller or rolls & Fast Knife Changing

S310R TRAILED MOWER

Side Pull Configuration. Excellent ground following, high manoeuvrability, and good crop preservation. The robust pivoting headstock allows for tight turns of more than 90° while keeping the PTO line straight. Maintenance is lower too, with only one oil change point.

- Power Take-Off (PTO) Speed 1000 rpm
- 3.1m working width
- 7 discs, impeller or rolls, & Fast Knife Changing

JOHN DEERE BALERS

WRAPPER BALER

NEW C442R

Unmatched Productivity

Oversized pickup, high-speed transport table, and 40 rpm wrapper arm
Delivers record-breaking output through fully automated baling and wrapping

Connected Efficiency

ISOBUS Compatible with Speed Automation as standard

Automatic data sync to John Deere Operations Center

Tracks bale count, weight, and location for easy invoicing and job management

Easy knife changes

no need to crawl under the baler

Downward-folding film storage

for ergonomic film replacement

Film-on-film wrapping

for superior bale protection

- **Bale Size:** Adjustable from 1.25m to 1.35m diameter
- **Cutting Length Options:** 68mm or 40mm
- **Pickup Width:** 2.2m (DIN 11220) cam-track design
- **Rotor:** MaxiCut HC68 in-line rotor with 3 tines per revolution
- **Dropfloor:** Full-width for quick blockage clearance
- **Bale Formation:** 18 rolls for consistent density
- **Binding Options:** Standard net binding or optional film binding

ROW UNIT

MARKET LEADING ROW UNIT

“The most technologically advanced row unit on the market.”

GEORGE SLY - FOUNDER, OWNER

Vertical Disc

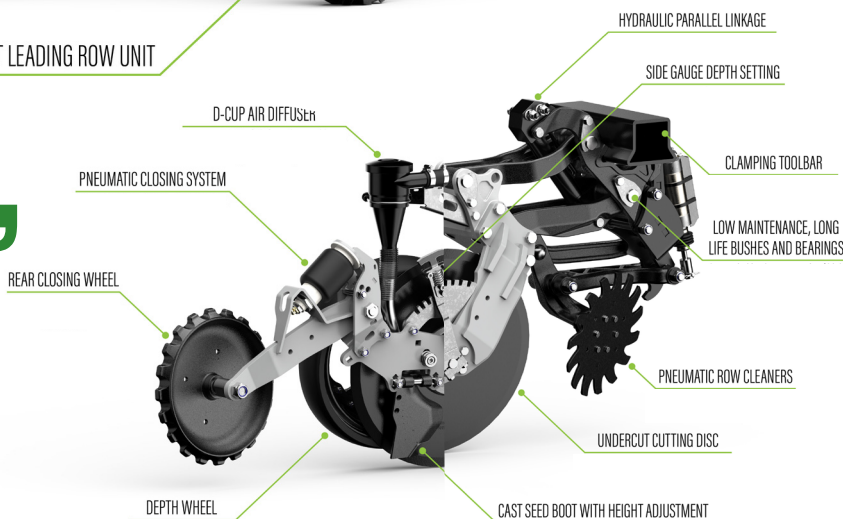

Struggles to consistently penetrate and close hard no-till conditions.

Double Disc

Requires a lot of downforce, has high running costs (double) and can stall in soft or high residue situations.

Undercut Disc*

With low running costs, this solution is best for consistently penetrating the soil and closing the slot.

“...minimal impact on soil health”

THE UNDERCUT DISC

Penetrates the soil effortlessly with minimal downforce and excellent closing in a variety of soils.

The undercut disc is angled 10° on the Y-axis and 7° on the X-axis, ensuring excellent penetration and easy slot closure, even in tough conditions. This design helps pull the row unit into the soil, reducing downforce while maintaining an easily closable slot profile in both wet and dry soils. Paired with a bespoke gauge wheel that optimises seeding depth and minimises compaction, the Gen 3 DSX row unit delivers planter-level performance with minimal impact on soil health.

BAILEY TRAILERS

NEWS

Tallis Amos Group (TAG) Appointed Exclusive Bailey Trailer Dealers for Shropshire

Tallis Amos Group (TAG) is delighted to announce that they have been appointed as exclusive dealers for Bailey Trailers in Shropshire, meaning they can now offer Bailey Trailers across their entire area.

This strengthened partnership unites two trusted brands, combining Bailey's exceptional trailer engineering with TAG's commitment to quality service and customer support.

"Bailey Trailers are renowned for their exceptional build quality and reliability, a perfect fit for TAG," says Tom Shakeshaft, Sales Director at Tallis Amos Group. "Bailey is a family company we know well, having worked with them for many years and so we're delighted to expand and grow this partnership together. We're proud we can now offer Bailey Trailers exclusively in Shropshire from our Allscott depot, and in turn across all six of our depots and we look forward to offering their industry-leading range of trailers to all of our customers."

Bailey Trailers produce 1,400 trailers every year with 1,120 sold in the UK. The Bailey Trailer range covers every farming season. From all-round trailers for arable, vegetables, and silage, to specialist models for bales, beets, and peas, there's a Bailey trailer designed for every farm or contracting business. Their trailers are renowned for their durability, innovation, and British manufacturing excellence, making them a valuable addition to TAG's product portfolio.

KRAMER

TELEHANDLERS

NEW KT 316 TELEHANDLER

The new Kramer KT316 Telehandler has arrived at Tallis Amos Group (TAG) and it's set to redefine compact performance.

With a **lift capacity of 3,100 kg** and a **stacking height of 5.83 m**, this compact powerhouse combines strength, agility, and efficiency. Powered by a Deutz 2.9L 82 kW (112 hp) engine, the KT316 delivers outstanding productivity for demanding jobs in agriculture, construction, and beyond.

Standard features include a **40 km/h top speed**, **reversible fan**, and **four steering modes with automatic synchronisation**, all wrapped into a machine just **2.15 m high** and **2.09 m wide**, perfect for tight spaces.

See the KT316 in action and experience Kramer's performance for yourself.

Book your demo today with your local TAG branch on: **0345 222 0456**

Highlights

- **Dynamic Weighing System:** Weigh loads easily and accurately, regardless of attachment or position.
- **7" LCD Display:** Clear data and intuitive jog dial control.
- **Easy Maintenance:** Wide-opening hood and simple service access.
- **Award winning Smart Attach System:** Fully hydraulic quick-change system for fast, tool-free attachment swaps.

NEW ULTIMA EJECTOR

BRITISH
MADE

AW TRAILERS

NEW
2026

A W Trailers, based in Herefordshire are known for producing strong, high-quality trailers since 1993. The ejector trailer offers clear advantages where tipping is unsafe or impractical. Built from high-tensile steel, the **18T Ultima Ejector** offers approx. **30 cu.m capacity**, with up to 30% extra when compacting forage. A hydraulically driven moving front wall and floor ensure

smooth, safe unloading without raising the body. The trailer sits on BPW commercial running gear and showcases AW's top-spec options, including air brakes, hydraulic suspension, and steering. 20T and 24T tri-axle versions will also be available.

SPRING DELIVERY

on our Range of Pottinger

MOWERS

NOVACAT 302 PLAIN REAR MOUNTED MOWER

3.04m working width, 70hp required, 930kg, 3.8m transport height, 14 mower blades. Centre pivot mounting have minimum ground pressure and perfect ground tracking.

NOVACAT F 3100 OPTICURVE PLAIN FRONT MOUNTED MOWER

3.04m working width, 60hp required, 680kg, 3.8m transport height, 7 Mower Discs, 14 mower blades, front three point.

OPTICURVE side shift system guarantees a perfect overlap with the rear mower and ensures the tractor drives along a clear track free of forage when cornering and working on steep ground.

POWER HARROWS

LION V 5040 5m / V 6040 6m MEDIUM WEIGHT FOLDING POWER HARROWS

150 - 320hp required, 342 rpm rotor speed, levelling board adjusted automatically, spring mounted side boards, tines are swapped or changed easily with Quick Fix. The internal components on the LION power harrow also deliver maximum strength, durability, and smooth operation; an excellent combination for enhanced reliability in the field.

POTTINGER | PRE-SEASON SAVINGS

TEDDERS

Innovative **DYNATECH** rotor technology ensures a clean and tidy spread pattern with maximum forage conservation. The tedders ground tracking works perfectly and provides ideal conditions for harvesting high quality forage on level, uneven or hillside ground.

HIT 6.80 TEDDER

High area output, simple design, 6 Rotor, 7.85m working width, 6 arms per rotor, 3m transport width, with mechanical stabiliser struts to ensure smooth tracking, 45hp required.

HIT 8.81 TEDDER

Large area output with excellent tedding quality, 7.81m working width, 8 Rotor, 5 arms per rotor, 2.94m Transport width, 65hp required, ideal with a mower of a working width of 3m.

HIT 13120 TEDDER

Innovative **DYNATECH** rotor technology ensures a clean and tidy spread pattern with maximum forage conservation, 13.2m working width, 12 Rotor, 6 arms per rotor, 2.9m transport width, 75hp required.

RAKES

MULTITAST WHEEL TOP forage quality. TOP milk yield.

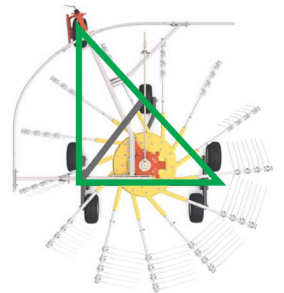

Offset in front of the rotor, the wheel ensures perfect ground tracking without the tines contacting the ground. The service life of the cam rollers and tines is also extended as a result.

25 % less raw ash/contamination

On approaching a rise, the MULTITAST wheel lifts the rotor. This ensures the ideal gap between the tines and the ground is maintained. Clean forage is guaranteed.

With a MULTITAST Wheel

The MULTITAST wheel makes the support triangle much larger, this makes the rotors run more smoothly and suppresses vibrations. The wheel provides ground tracking and guarantees clean forage without disintegration losses.

TOP C Twin rotor rakes with centre swath delivery with transport chassis.

TOP 762 C CLASSIC

6.75m - 7.5m working width, swath width 1.1m - 2m, rotor diameter 3.3m, 11 tine arms per rotor, 4 tines per tine arm, 60hp required, Inner jockey wheels on all rotors, 3-wheel chassis.

TOP 762 C

6.75m - 7.5m working width, swath width 1.1m - 2m, rotor diameter 3.3m, 13 tine arms per rotor, 4 tines per tine arm, 60hp required, Inner jockey wheels on all rotors, 5-wheel chassis including, tandem axles.

TOP 882

7.7m - 8.8m working width, swath width 1.3m - 2.6m, rotor diameter 3.7m, 13 tine arms per rotor, hydraulic Working width adjustment, 4 tines per tine arm, 70hp required, Inner jockey wheels on all rotors, 5-wheel chassis including, tandem axles.

SHELBOURNE REYNOLDS

MUCKSPREADER

SHELBOURNE POWERSPREAD PRO 3200

Built to handle all types of farmyard manure and waste products with impressive power and accuracy. 3200-gallon, long wheelbase, single-axle spreader on 650/65R30.5 tyres delivers rugged performance and exceptional reliability, making it a top choice for contractors and large farms alike.

With over 15 years of product development, the Powerspread Pro range combines proven Shelbourne design with modern engineering. The overshot discharge rotor provides an even and accurate spread pattern up to 20 metres, while the right-hand, centrally mounted rotor and vertically opening sealed door ensure efficient, controlled discharge.

The 1.4m-wide rotor boosts output, and the hydraulically lowering rotor allows quick access for maintenance or to clear foreign objects. A heavy-duty chain drive, shearbolt protection, and reverse auger function ensure dependable performance in tough conditions.

From slurry and compost to poultry manure and farmyard waste, the Powerspread Pro 3200 is built for strength, simplicity, and high output.

Capacity: 3,200 gallons

Axle: Single axle, long wheelbase

Tyres: 650/65R30.5

Spread Width: Up to 20m

Discharge System: Overshot right-hand, centrally mounted rotor

Rotor Width: 1.4m

Key Features:

- Even, accurate spread pattern
- Spreads solid, semi-liquid, and compost materials
- Vertically opening sealed discharge door
- Heavy-duty chain drive system
- Shearbolt protection on auger, paddles, and PTO
- Reverse auger function for easy blockage clearance
- Hydraulically lowering discharge rotor for quick access
- Anti-bridging arm for smooth material flow

FEEDER

SHELBOURNE REYNOLDS POWERMIX 20M³

AVAILABLE TO DEMO!

Designed with strength, simplicity, and ease of use in mind, the Powermix helps save time while ensuring top-quality feed presentation for your herd.

If you'd like to see the Powermix in action on your farm, get in touch with us today.

SPRING DELIVERY
on our Range of Shelbourne Reynolds

Capacity: Approx. 10,000kg (20m³)

Power Requirement: 125HP

Configuration: Single/sprung tandem axle

Key Features:

- Twin auger design for fast, even mixing
- Heavy-duty stepped auger with stainless steel edging
- 12.5mm S500 steel tub wall & 15mm auger
- Smooth tub for efficient bale processing
- Front viewing ladder and dual-side scale visibility
- Hydraulic right front door (optional left/centre rear doors)
- 2-speed gearbox and direct-coupled hydraulics
- Hydraulic brakes and rear LED road lights

Tyres: Single Axle: 435/50 R19.5 Tandem Axle: 385/55 R22.5

Built for:

Compact handling, strong performance, dependable daily feeding.

SHELBOURNE REYNOLDS

HEDGECUTTERS

GP1200 (LH) FLAIL HEAD with bolted adjustable roller. General Purpose head suitable for grass or multi-year hedge growth.

Options: Hydraulic Head Roller, Hydraulic Nose, Verge Kit, Narrow Lane Bracket

Cutting Width 1.2m
Low Profile
Double Skinned
Rotor Diameter 110mm
Roller Diameter 125mm
Twin Vee Drive

50mm Rotor Bearing
Fixed Mounting
Double Spiral Flail Pattern
24 x Drop Forged Flails
T or Competition Flails
Weight - 360Kg

HEDGECUTTER 6056

Reach: 5.6m (fixed boom)

Ideal for: Verge mowing and medium-sized tractors

Hydraulics: 70HP hydraulic system with oil cooler & fan

Control: Digital proportional joystick

Boom Design: Parallel boom geometry for smooth operation

Flail Head: GP1200 (LH) with bolted adjustable roller

Frame: Heavy-duty 4-point stabiliser frame

Drive: Cable control rotor drive

Additional Features:

LED road lights

Parking stands / forklift shoes

Compact design with low overall weight

Built For:

Farmers and contractors needing reliable hedge-cutting power in a compact, easy-handling package.

HEDGECUTTER 6060T

Reach: 4.8m retracted, 6.0m fully extended (telescopic boom)

Design: Compact telescopic trimmer ideal for narrow lane work

Hydraulics: 70HP hydraulic system with oil cooler & fan

Control: Digital proportional joystick

Boom Design: Parallel boom geometry for smooth, accurate cutting

Flail Head: GP1200 (LH) with bolted adjustable roller

Frame: Heavy-duty 4-point stabiliser frame

Drive: Cable control rotor drive

Additional Features:

LED road lights

Parking stands / forklift shoes

Compact design without compromise on reach

Built For:

Farmers and contractors needing long reach, high performance, and easy manoeuvrability in confined spaces.

CUBICLE BEDDER

CUBICLE BEDDER 150

Capacity 1.2m³. Creates a uniform bed quickly and efficiently with minimal operator effort. A wide range of materials can be spread such as sand, sawdust, wood shavings, processed paper, lime & straw and gypsum.

MUTHING

Muthing

MU-M VARIO 280

Delivers efficient crop residue management with low power requirements and consistent performance even in heavy organic material.

Its versatile dual headstock with side shift allows front or rear mounting, while crop discharge can be set in front of or behind the support roller.

The integrated Vario system and smooth-running spiral rotor ensure optimal operation, supported by durable "DuraX" M-hammer flails and a "shark fin" chopping bar for excellent material flow and mulching quality.

Height-adjustable support roller with robust Starinth bearings.

- 25 year anniversary
- 200hp Rated, 2.8m Cut
- With high tempered "M" hammer flails
- Central Gearbox with integrated over run clutch
- Automatic Belt Tension - 4 Belt Drive
- Hardox wearing Skids
- Patented removable shredding bar - Shark Fin
- Adjustable Vario Cutting Bar
- Hydraulic Side Shift 56cm
- "Starinth" Rear Roller Bearings
- Front & Rear Mount
- Hood wear plate, Rear roller flap

DALBO

DALBO

£36,000

DALBO 12.3M MAXIROLL HD CAMBRIDGE ROLLS + CRACKER BOARDS

12.3m Width, 55 Cm Snowflake Ring
Hydraulic Cracker Boards, 520/50 X 17 Tyres,
LED Lights and Automatic Transport Locks

Hydraulically adjustable cracker board, crushes clods and levels soil to create an ideal surface ahead of the roller, lifts out of work when rolling for added versatility, performs best at 8-10 km/h.

SNOWFLAKE® breaker rings suit most pre- and post-sowing tasks, including rolling after sowing and pasture maintenance. Cross Combi rings create a firm yet lightly loosened seedbed and, with a cracker board, can crush and level heavier soils. Crosskill rings are ideal for seedbeds, leaving a loose surface with firmer soil beneath for optimal sowing conditions.

MAXIROLL GREENLINE 6.3M

6.3M WORKING WIDTH, DUOFLEX CONTOUR SYSTEM AND LED LIGHTS, 610 MM DRUMS WITH SMOOTH ROUNDED ENDS, STRONG FLANGE BEARINGS, FULLY HYDRAULIC FOLDING AND UNFOLDING OF SECTIONS, DETACHABLE SUPPORT LEGS, DUOFLEX WITH INDIVIDUAL FLEXIBILITY BETWEEN SECTIONS. AUTOMATIC WEIGHT DISTRIBUTION WITH SPRINGS THAT ENSURE AN EVENLY DISTRIBUTED GROUND PRESSURE IS ENSURED ACROSS THE FULL WORKING WIDTH, REGARDLESS OF THE CONTOURS OF THE SOIL.

MAXIROLL 8.3M

55CM SNOWFLAKE RINGS, DUOFLEX CONTOUR SYSTEM AND LED LIGHTS. FULLY HYDRAULIC FOLDING AND UNFOLDING OF SECTIONS. SWITCHING FROM DRIVING ON ROADS TO FIELD OPERATION WITHOUT LEAVING THE TRACTOR. Ø60 MM SHAFTS MADE OF HIGH-TENSILE STEEL. STRONG FLANGE BEARINGS. HYDRAULIC WEIGHT DISTRIBUTION THAT ENSURES AN EVENLY DISTRIBUTED FIELD PRESSURE OVER THE ENTIRE WORKING WIDTH, REGARDLESS OF THE CONTOURS OF THE FIELD.

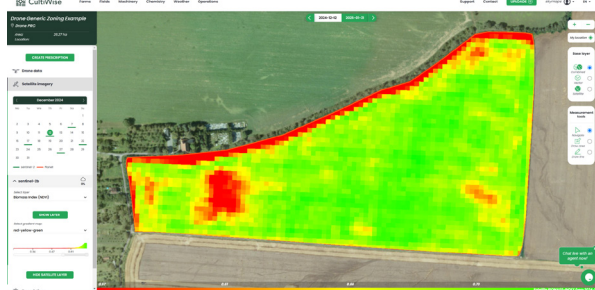

CULTIWISE

TALLIS AMOS GROUP (TAG) PARTNERS WITH CULTIWISE DRONE MAPPING FOR MORE PRECISE AND EFFICIENT CROP PROTECTION

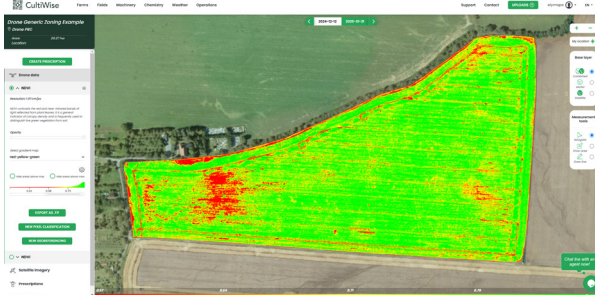

Cultiwise drone mapping is a fast, reliable and precise way to create application maps for variable rate applications of fertiliser, fungicide or growth regulators even when satellites are blocked by clouds. The advanced software produces highly accurate "prescription maps" using drone technology, helping farmers to save up to 70% on crop treatments.

All our dedicated TAG TECH Team hold a Remote Pilot Certificate of Competence which allows them to fly the TAG Cultiwise drone and collect field data instantly. Images taken by the drone are uploaded to the Cultiwise platform which produces a detailed map where more or less fertiliser, fungicide or growth regulator is required in the field. By using spraying equipment with variable rate application this service will not only reduce farmers chemical usage & fertiliser usage, but also increase yields in some crops.

Satellite

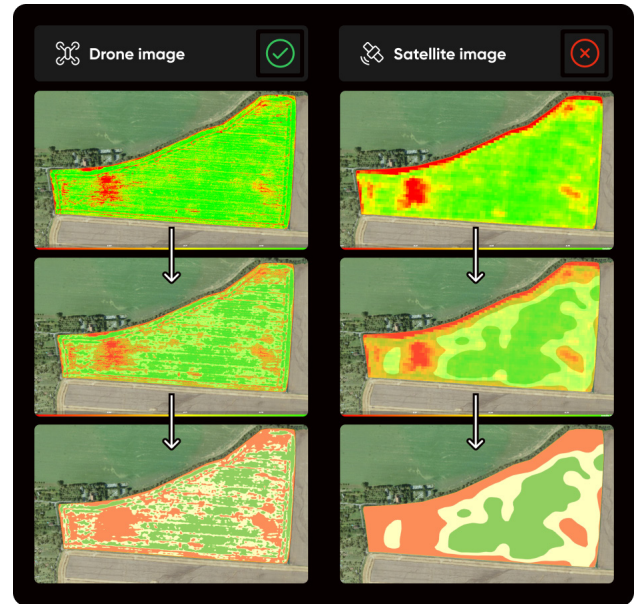

Drone

The cameras on the drone capture far more detail than satellites, which is useful in the early stages of crop growth and gives clear more accurate data of fields. This form of drone mapping also offers farm businesses an effective way of crop monitoring, plant counting and predicting yield potential.

The system can be used on a wide variety of crops including maize, winter wheat, oilseed rape, potatoes and even onions. It helps to meet stricter environmental regulations by reducing the use of fungicides, pesticides and fertiliser and helps farm businesses improve on their crop protection, lower costs and increase yields for more sustainable farming practices.

For further details on this service please contact the TAG TECH Team on: 07893 933 804

SAMSON

SLURRY TANKER

Capacity: 15m³

40 km/h road approval, EU167/2013 compliant

Multiple pump and filling options

New hydraulic system with proportional control

Rigid chassis piping for improved reliability

Optional automatic central greasing system

NEW

NEW TG 15 SLURRY TANKER

SAMSON has expanded its tanker range with the **new TG15**, a 15 m³ model designed for both pumping and applying slurry or digestate. Built for farms, contractors, and cooperatives, it offers versatile pump options — including the Ejector system, SAPI, SAP2, and external filling — delivering reliable, flexible performance for everyday use.

Road approval was a key focus in its development. The TG15 is certified for 40 km/h transport and fully compliant with EU167/2013, meeting the increasing demand for machines that can legally and safely operate on roads under stricter weight and safety rules across Europe.

The TG15 also brings important updates to the TG range, including a new hydraulic architecture, improved ECU, and the SM5000 terminal for smooth proportional control. Durable rigid piping replaces hoses for easier maintenance, and an optional automatic central greasing system — controlled from the cab — helps reduce daily servicing and extend machine life.

SUMO

CULTIVATORS

TRIO COMBINATION CULTIVATOR

Designed to work the full soil profile in one efficient pass, reducing disturbance, protecting soil carbon, and improving structure — all while **cutting fuel and input costs**. With optional seeder and SDO accessories, it can also operate as a true one-pass drilling system.

A proven British-built cultivator, the Trio combines deep-working legs, mixing discs, and the renowned **Multipacka** to deliver soil loosening, residue mixing, and a weatherproof finish in a single pass. Ideal for mixed or compacted soils, it performs excellently in both primary and secondary cultivation.

Versatile, efficient, and built for modern farming, **the Trio boosts productivity while lowering labour, fuel use, and machinery wear.**

Available in mounted or trailed formats, with working widths from **2.5m to 6.5m**.
